

Warrensburg Convention and Visitors Bureau

Visitor Center IT Budget Revision

The Visitor Center will need to be set up to connect with the City network. A rack, switch and other items will be required. The City utilizes a contract for discounted services/products using an agreement available for City's and Higher Institutions.

As this is not an item the WCVB will be quoting as the City has already entered into an agreement to utilize the contract at a discounted rate, the WCVB Board needs to approve the budget be revised to include no more than \$6,000 for IT services to connect the Visitor Center (407 E. Russell Ave. St. 2) with the City network.
